# **XUEQING WU**

(217)-305-0509 ♦ xueqing8@illinois.edu ♦ shirley-wu.github.io ♦ google scholar

#### **EDUCATION**

## University of Illinois Urbana-Champaign

08/2021 - Present

MS (thesis-based) in Computer Science. Advisor: Prof. Heng Ji

## University of Science and Technology of China

09/2016 - 06/2020

BS in Electronic Engineering and Information Science.

GPA: 4.03/4.30 (rank: 1/363). Graduated with Guo Moruo scholarship (top 1%).

### INTERNSHIP & RESEARCH

## Bytedance AI Lab (Beijing, China)

07/2020 - 07/2021

Research Intern. Mentor: Hang Li

· Proposed and benchmarked a novel IE setting which extracts table-format information and requires no pre-defined schema. Adopted a seq2seq approach and employed constrained decoding and table embeddings to improve generation, which significantly outperforms NER and RE. [1]

## Microsoft Research Asia (Beijing, China)

10/2019 - 07/2020

Research Intern. Mentor: Tao Qin

- · Proposed a new sequence learning framework, which boosts a given main task using temporally correlated tasks as auxiliary training tasks. Designed a novel algorithm using RL to jointly train the task scheduler, and improved the baselines on four simultaneous translation tasks and a stock forecasting task. [2]
- · Employed BERT as the contextual feature extractor for context-aware machine translation, and analyzed three feature aggregation methods. Achieved state-of-the-art on three datasets. [3]
- · Developed a simple but effective data augmentation method for machine translation based on sentence concatenation and improved the performance on nine datasets. [4]

## University of Science and Technology of China (Hefei, China)

03/2019 - 06/2019

Research Assistant. Mentor: Prof. Jun Du

· Proposed two techniques for oriented object detection in aerial images: a novel tilt angle representation to avoid ambiguity, and an IoU calculation method to increase positive candidates of long objects in RPN stage. Won the first prize (32 in total) in ODAI Challenge-2019 held by CVPR. [5]

#### **SKILLS**

Language: Python, C++, Java. Deep learning: PyTorch, fairseq, transformers. OS: Debian.
